Professional Experience

Uber Eats / Software Engineer Intern

May 2020 – Aug 2020 • Remote

- Established blackbox testing for the new mobile checkout experience using Composable Testing Framework with Go.
- Built a platform service to centralize metrics and asynchronously update configurations for order events using Java, Flink, and M3.

Juni Learning / Coding Instructor

October 2019 – Present • Remote

- Taught the fundamentals of programming, such as loops and conditionals, by creating projects on Scratch and Python to students age 8-18, one on one, once a week.

Bank of America / Tech Analyst Intern

June 2019 – August 2019 • New York, NY

- Implemented a live dynamic reporting system, connecting JIRA and Confluence via Python on Jupyter Notebook.
- Designed and developed a CTF-inspired game to enhance cyber security training experience for employees using AGILE.

Activities

NYC Leader, Fellow / Rewriting the Code

September 2019 – Present • New York, NY

- Coordinated informational and social events for college women in tech, providing professional and leadership development along with access to peer support.

Ambassador / Built By Girls

June 2020 – Present • New York, NY

- Championed membership to BUILT BY GIRLS amongst female peers in order to explore careers in tech.

Coordinator / Artists Reaching Out

February 2019 – Present • New York, NY

- Partnered with local afterschool programs, restaurants, shelters, and Columbia students to provide arts education to elementary students via volunteering and weekly newsletters.

Education

Columbia University

School of Engineering

2018 – Present • New York, NY

- **Bachelor of Science:** Computer Science
- **GPA:** 3.5 / 4.0
